IMPORTANT SAFEGUARDS
When using your iron, basic safety precautions should always be followed:
• Read all instructions.
• Use iron only for its intended use.
• To protect against a risk of electric shock, do not immerse the iron in water or any other liquids.
• The iron should always be turned to the lowest position before plugging or unplugging from outlet. Never yank cord to disconnect from outlet, instead grasp plug and pull to disconnect.
• Do not allow cord to touch hot surface. Let iron cool down completely before putting away. Loop cord loosely around iron when storing.
• Always disconnect iron from electrical outlet when filling with water or emptying and when not in use.
• Do not operate iron with a damaged cord or if the iron has been dropped or damaged. To avoid the risk of electric shock, do not disassemble the iron, take it to a qualified serviceman for examination and repair. Incorrect reassembly can cause a risk of electric shock when the iron is in use.
• Close supervision is necessary for any appliances being used by or near children. Do not leave iron unattended while connected or on an ironing board. Burns can occur from touching hot metal parts, hot water or steam.
• Make sure to unplug the appliance when leaving the iron.

HINTS BEFORE USE
• Before using for the first time, check if the voltage rating on the soleplate corresponds to the mains voltage in your home.
• Remove all packing materials, clean the iron surface. On first use, there can be a light smell or smoke, and this is quite safe and only for a short duration.
• Insert the power plug in a suitable socket and set the Temperature Control Dial on maximum temperature setting, the Indicator Light will light up and when it goes off, and iron and old piece of cloth for test.

KNOW YOUR IRON
A. Skirt
B. Upper Cover
C. Temperature control dial
D. Power cord protector
E. Indicator Light
F. Soleplate

SETTING THE TEMPERATURE
• Turn the Temperature Control Dial to the position according to the following markings:

Synthetics/Silk (low temperature)
Silk wool (medium temperature)
Linen/cotton (high temperature)

HOW TO START DRY IRONING
• Classify the clothing according to labels attached thereto before use. Speed of the iron-heating is quicker than its cooling, so you should begin ironing the clothes which requires a lower ironing temperatures first (synthetic fibre fabric and silk), and then iron the clothes of other materials requiring for higher temperature in proper order (woolen, cotton and jute, etc).
• Place the iron vertically and set the Temperature Control Dial at OFF position.
• Insert the plug into the socket, turn the Temperature Control Dial the temperature point required by the clothing materials and aim the material indentify mark at the heating indicator. May start ironing when the indicator Light turns off.

Care
• Turn the Temperature Control Dial to OFF position and unplug the power store the iron after it is cool completely.
• Remove the cord from the outlet by grasping the plug rather than pulling the cord, and allow iron to cool.
• Avoid ironing over zippers/rivets on jeans etc. these can scratch the soleplate.

Attention:
When the plug connecting with the power socket, the user is not allowed to leave.
When the power cord is damaged, contact your dealers or an authorized service center for repair.
In case of any repairs, replacement of cord or plug, or adjustment, please consult a qualified technician, or take appliance to an authorised service facility.
